

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 26, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest, Western Great Basin and Eastern Great Basin Areas and light elsewhere. Nationally, 276 fires were reported. Five new large fires were reported, three in the Northwest and one each in the Southwest and Northern California Areas. One large fire was contained in the Southwest Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Montana, Nevada, Oregon and Washington.

ALASKA AREA LARGE FIRES:

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Anderson) is assigned. This fire is 20 miles northeast of Fairbanks, AK in tundra and black spruce. A warmer and drier morning allowed for some modest fire spread, but a cooler afternoon brought precipitation to all areas of the fire, resulting in minimal fire activity.

TAYLOR HIGHWAY COMPLEX, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Bateman) is assigned. This complex, comprised of the Billy Creek, Gardiner Creek, Big Creek, and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Light drizzle and cloud cover decreased fire activity.

CENTRAL COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Furlong/Gormley) is assigned. This complex, comprised of the Middle Birch Creek, Preacher Creek, Rock Creek, Crazy, Bolgen Creek, Big Bluff, Wolf Creek and Takoma Bluff fires, is 15 miles southwest of Circle, AK in spruce and hardwoods. Some smoldering and occasional torching occurred in jackpots of heavy fuels. Structure protection remains in place in the communities of Central and Circle Hot Springs.

CHICKEN, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Goheen) is assigned. This fire is 50 miles northeast of Tok, AK in timber, hardwoods and grass. Very isolated smoldering was reported.

WOLF CREEK, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Minimal fire activity was reported.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northeast of Delta Junction, AK in tundra and spruce. The fire received precipitation today which minimized fire behavior.

PINGO, Upper Yukon Zone, Bureau of Land Management. This fire is five miles north of the village of Venetie, AK in black spruce, hardwoods and tundra. Moderate fire behavior with occasional flare-ups in heavy fuels was observed.

LOWER MOUTH, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. No new information was reported.

AGGIE 2, Fairbanks Area Forestry, Alaska Division of Forestry. This fire is 25 miles north of Fox, AK in spruce and hardwoods. Minimal fire behavior was observed.

NORTHWEST AREA LARGE FIRES:

LOG SPRINGS, Warm Springs Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (West) has been ordered. This fire is 21 miles north/northwest of Warm Springs, OR in timber and heavy downed fuels. Extreme fire behavior with group torching and running crown fire was observed.

LAUDERDALE, Washington State Department of Natural Resources – Southeast. A Washington Interagency Management Team (Berndt/Andring) has been ordered. This fire is five miles east/southeast of Cle Elum, WA in ponderosa pine sagebrush and grass. Wind-driven fire behavior with group torching was reported. Fire behavior moderated as winds diminished towards the end of the day.

POT PEAK COMPLEX, Okanogan/Wenatchee National Forest. A transfer of command from Type 2 Washington State Interagency Incident Management Team (Johnson) to a Type 1 Incident Management Team (Lohrey) will occur today. This complex, comprised of the Pot Peak, Graham Harbor and Pyramid fires, is 15 miles northwest of Chelan, WA in timber.

DOWNEY CREEK, Mt. Baker-Snoqualmie National Forest. This fire is 16 miles north/northeast of Darrington, WA in the Glacier Peak Wilderness. Plume-dominated fire activity in timber and brush in steep inaccessible terrain was reported. Cooler temperatures and higher overnight humidity recovery moderated fire behavior.

SISI RIDGE, Okanogan/Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. Lohrey's Type 1 Incident Management Team will manage the Sisi Ridge fire and the Pot Peak Complex. This fire is eight miles east of Stehekin, WA in timber, brush and alpine grass. Increased fire behavior with group and single tree torching was observed.

NORTHERN CALIFORNIA AREA LARGE FIRES:

IRONGATE, Siskiyou Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Management Team (Streblow) is assigned. This fire is approximately 17 miles northeast of Yreka, CA in grass, brush and scattered timber. No further information was received.

STRAYLOR, Lassen-Modoc Unit, California Department of Forestry and Fire Protection (CDF). This fire is 20 miles southeast of Fall River Mills, CA in timber, litter and understory. Strong gusty winds from passing thunderstorms caused spotting and torching.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MEADOW COMPLEX, Yosemite National Park. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use (WFU) incident, located four miles southeast of Yosemite Valley, CA in timber, is being managed to accomplish resource objectives and consists of the Meadow, Jay, River, and several other small fires. The Meadow fire reported reduced fire spread and moderate fire behavior. Other fires in the complex reported smoldering and intermittent creeping fire behavior with no appreciable growth.

OUTLOOK:

Red Flag Warning: Strong winds for portions of Alaska's central interior and the north slopes of the Alaska Range.

Weather Discussion: An upper trough moving into the Pacific Northwest will bring dry and somewhat cooler weather along with gusty winds east of the Cascades. A strong upper high remains centered over Southern California with the axis of the ridge extending into Montana. Hot weather will continue over Southern California, while drier conditions and gusty winds develop over western Nevada. Thunderstorms will be found over Montana and the Eastern Great Basin, Rocky Mountain and Southwest Areas. In Alaska, a south flow over the area will bring gusty winds and low humidity to portions of the central interior and north slopes of the Alaska Range.

| Geographic Area Weather | High Temperatures | Minimum Relative Humidity | Wind |
|--|---|--|---|
| ALASKA AREA Central and Eastern Interior: Partly cloudy; locally windy. | Central and Eastern Interior: Mostly 70s. | Central and Eastern Interior: 25 to 40%. | Central and Eastern Interior: South to southeast 10 to 20 mph. |

| | | | |
|---|---|--|--|
| <p>NORTHWEST AREA Chance for a few isolated thunderstorms in extreme eastern OR. Otherwise, mostly sunny.</p> | <p>75 to 85 western WA and northwest OR. 85 to 95 southwest OR and areas east of the Cascades.</p> | <p>30 to 45% western WA and northwest OR. 10 to 20% southwest OR and areas east of the Cascades.</p> | <p>Generally, west-northwest 5 to 15 mph. North to 20 to 25 mph in southwest OR coastal sections.</p> |
| <p>NORTHERN CALIFORNIA AREA Night and morning coastal fog and low clouds. Clear elsewhere with afternoon cumulus over the mountains.</p> | <p>60s to 70s coastal areas. 80s to 90s higher terrain. 90s to 102 inland valleys.</p> | <p>8 to 18% east of the Cascade-Sierra crest. 50% or more coastal areas. 12 to 22% elsewhere.</p> | <p>Southwest to northwest 4 to 12 mph with higher afternoon gusts.</p> |
| <p>EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly cloudy with isolated thunderstorms in ID; scattered thunderstorms in western WY. Utah, Arizona Strip: Partly cloudy; isolated thunderstorms lower elevations. Scattered thunderstorms mountains</p> | <p>Idaho, Bridger-Teton: 63 to 85 mountains. 85 to 95 valleys. Utah and Arizona Strip: 69 to 90 mountains. 85 to 110 valleys. 110 to 117 Lake Mead.</p> | <p>Idaho, Bridger-Teton: 23 to 35% mountains. 13 to 25% valleys. Utah, Arizona Strip: 15 to 36% mountains. 5 to 25% valleys.</p> | <p>Idaho, Bridger-Teton: West to northwest at 5 to 12 mph. Utah, Arizona Strip: West to southwest at 10 to 20 mph.</p> |
| <p>SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal areas. Otherwise mostly sunny, except becoming partly cloudy with isolated thunderstorms over the Southern CA mountains and deserts east of Cajon Pass in the afternoon.</p> | <p>75 to 85 coastal areas. 85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 105 to 115 lower deserts.</p> | <p>12 to 25% valleys. 10 to 20% mountains. 10 to 20% deserts.</p> | <p>Southeast to southwest 10 to 20 mph.</p> |
| <p>SOUTHWEST AREA Partly cloudy in AZ with widely scattered thunderstorms east. Mostly cloudy in NM and west TX with scattered showers and thunderstorms.</p> | <p>Upper 60s to 80s NM and west TX mountains. 90s to 105 AZ deserts and lowlands.</p> | <p>10 to 20% northwest AZ, 20 to 40% remainder of AZ. 30 to 50% NM and west TX.</p> | <p>Northwest 5 to 15 mph in northwest AZ and northwest NM. East to south 5 to 20 mph remainder of AZ, NM and west TX.</p> |
| <p>ROCKY MOUNTAIN AREA Scattered afternoon thunderstorms west; dry east.</p> | <p>80s. 60s to 70s mountains.</p> | <p>15 to 20% eastern Wyoming and western SD. 25 to 35% elsewhere.</p> | <p>Southerly 10 to 20 mph over the eastern plains. Otherwise variable 5 to 15 mph.</p> |
| <p>WESTERN GREAT BASIN AREA Isolated to scattered thunderstorms north and east; some may be dry. Sunny south.</p> | <p>90 to 100 north valleys. 95 to 105 south valleys. 75 to 90 mountains.</p> | <p>5 to 12% south. 7 to 17% north. 15 to 27% mountains.</p> | <p>West to north at 10 mph with gusts to 25 mph in the north. Southwest to west at 10 mph with gusts to 20 mph in the south.</p> |

HYDRATION

Studies conducted on wildland firefighters indicate that fire suppression activities generate about 7.5 kilocalories of heat each minute worked or 450 kilocalories for each hour. Additional heat (about 180 kilocalories per hour) comes from the environment and the fire. The total heat load amounts to 580 kilocalories per hour ($400 + 180 = 580$). Complete evaporation of 1 liter of sweat removes 580 kilocalories of heat. In order to maintain a healthy body temperature, the firefighter needs to evaporate about 1 liter (slightly more than 1 quart) of sweat during each hour of work.

- Maintaining body fluids is essential for sweating. You must hydrate before, during and after work.
- Before work you should take extra fluids to prepare for the heat. Drink 1 or 2 cups of water, juice or a sport drink before work. Avoid excess caffeine; it hastens fluid loss in the urine.
- While working, drink at least 1 quart of fluid per hour. Drink as much as you can during the lunch break. Water is your greatest need during work in the heat.
- Providing a portion of fluid replacement with a carbohydrate/electrolyte sport beverage will help you retain fluids and maintain energy and electrolyte levels.
- After work it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs so you should drink more than you think you need.
- Rehydration is enhanced when fluids contain sodium and potassium or when foods with these electrolytes are consumed along with the fluid.
- Unacclimatized workers lose more salt in the heat so they need to pay particular attention to salt replacement. Don't overdo salt intake; too much salt impairs temperature regulation. Excessive salt can cause stomach distress, fatigue and other problems.
- Make potassium-rich foods like bananas and citrus fruits a regular part of your diet and drink lots of lemonade, orange juice, or tomato juice.
- Limit the amount of caffeine drinks, such as coffee and colas, because caffeine increases fluid loss. Avoid alcoholic drinks; they also cause dehydration.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue and dizziness.
- Rapid loss of several pounds of body weight is a certain sign of dehydration. Rehydrate before returning to work; continuing to work in a dehydrated state can lead to serious consequences including heat stroke, muscle breakdown and kidney failure.
